"Raise Your Profits with Direct Product Profit"

Philip Morris/McKinsey Study for Tobacco
Distributors—another door to greater profits

The classical way of looking at profitability is in the gross margins. However, when you analyze this method, it could be very misleading. The misleading factor lies in the fact that profit-robbing costs are ignored. "How to Raise Your Profits with Direct Product Profit" shows a new way of measuring true profits. This new approach involves the subtracting of the variables involved in carrying and selling the merchandise.

To get more information on this new booklet, write Philip Morris U.S.A., Dept. B, 100 Park

Ave., N.Y., N.Y. 10017, or contact your Philip Morris Area Manager—Distributor Sales. He can give you many valuable profit-building ideas from the whole series of new booklets. They're all part of the Philip Morris/McKinsey Study.
